

CLOUD COMPUTING

HOSTING SOLUTIONS

CLOUD COMPUTING SOLUTIONS

Cloud computing enables convenient on-demand access to a shared pool of resources (e.g., networks, servers, storage, applications, and services) that can be rapidly provisioned and released with minimal management. It helps your company maximize IT efficiency while minimizing costs. Atlantic.Net's scalable and robust cloud computing platform is supported by our worldclass infrastructure and certified engineers. Managing complex networks, servers, and storage has never been easier or more cost effective!

Years of experience in connectivity, advanced computing, and hosting solutions enable us to make cloud computing work for you. Unlike other one-size-fits-all cloud computing solutions, our approach is to configure a 'cloud' to serve you.

Industry Leading Cloud Service Level Guarantee

- ✓ Network Uptime - 100% Guaranteed
- ✓ Cloud Server Hardware - 100% Guaranteed
- ✓ Infrastructure - 100% Guaranteed

Comprehensive Cloud Computing Solutions

Atlantic.Net empowers users with IT capabilities previously available only to corporations with unlimited budgets. We provide a full line of cloud computing solutions to give you Infrastructure as a Service to best meet your business needs.

PRIVATE CLOUD

Are you considering cloud computing but have privacy, security, and compliance concerns? Private Cloud addresses those fears with a deployment of dedicated and secure resources using hypervisor technology. A Private Cloud is a hosting solution that combines a dedicated hardware platform with a virtualization layer that enables you to provision and manage virtual machines, security, and storage within a predefined set of physical systems. Our Private Clouds are provisioned using the latest hardware and software technology, including custom VMware, KVM, or Xen configurations to increase flexibility and portability. Private Clouds offer the benefits and savings of cloud technology with the assurance that your applications reside on a totally private infrastructure dedicated exclusively to your organization.

HOSTING SOLUTIONS

CLOUD SERVERS

A Cloud Server, or Public Cloud, helps eliminate the need to constantly purchase hardware. It also reduces maintenance costs associated with server infrastructure. Our Cloud Servers are an extremely cost-effective computing solution for companies looking to get more for less.

We can build, test, and deploy Windows or Linux servers in the cloud in seconds. A superior alternative to virtual private servers, Cloud Servers allow you to:

- ✓ Scale servers
- ✓ Pay only for what you use
- ✓ Run any software you wish
- ✓ Maintain full administrative access to your servers
- ✓ Create and control Cloud Servers programmatically using the RESTful API
- ✓ Provision servers in seconds on a highly redundant hardware platform
- ✓ Bill to the nearest second, starting at 1.5 cents per hour, with flexible usage
- ✓ Add a cPanel / WHM control panel to a Cloud Server for easy administration

HYBRID CLOUD

Whether you have already made a substantial investment in your IT infrastructure or you are simply looking to secure your data at an off-site location, Hybrid Cloud could be the right solution for you. Hybrid Cloud readily leverages existing or planned environments while maintaining the flexibility, security, and speed of a custom solution. The combination of the latest cloud computing technology with dedicated servers, managed hosting, colocation, or other existing on- or off-site equipment defines the new trend of Hybrid Cloud solutions. By utilizing secure networking paths we deliver a Hybrid Cloud solution by intertwining your planned or existing computing infrastructure with a custom cloud or other hosting solution. Hybrid Cloud solutions deliver the best of both worlds—tremendous cost savings and the ability to enjoy dedicated, secure, and robust hosting platforms with greater efficiency.

HOSTING SOLUTIONS

Redefining Hybrid Clouds

Our vast experience in connectivity, advanced computing, and hosting solutions enables us to provide unique solutions with complex technologies. We give our clients the best hybrid solutions available. Unlike one-size-fits-all hybrid solutions, our approach is to redefine the Hybrid Cloud. Our variation combines a cloud computing platform with any of the following options:

- ✓ Cloud in combination with the Atlantic.Net hosting solution of your choice.
- ✓ Cloud in tandem with server colocation at our data center or a data center of your choice
- ✓ Secondary cloud platform established in parallel to an existing public or private cloud.
- ✓ Cloud solutions in combination with existing computing solutions elsewhere.
- ✓ On-site and off-site private and public clouds, combined for a robust Hybrid Cloud solution.
