

VEEAM BACKUP

VEEAM BACKUP AGENTS

Atlantic.Net's Veeam Backup and Replication Agent service provides an industry-leading data protection suite to help guarantee data integrity on both physical and virtual infrastructure platforms. Our lightweight backup agents work seamlessly with Microsoft Windows Server and Linux servers to provide enterprise grade features, high performance, and extensive compatibility.

Make our fast, affordable, and proven backup technology the cornerstone of your data protection strategy!

KEY CAPABILITIES OF THE VEEAM BACKUP AGENTS

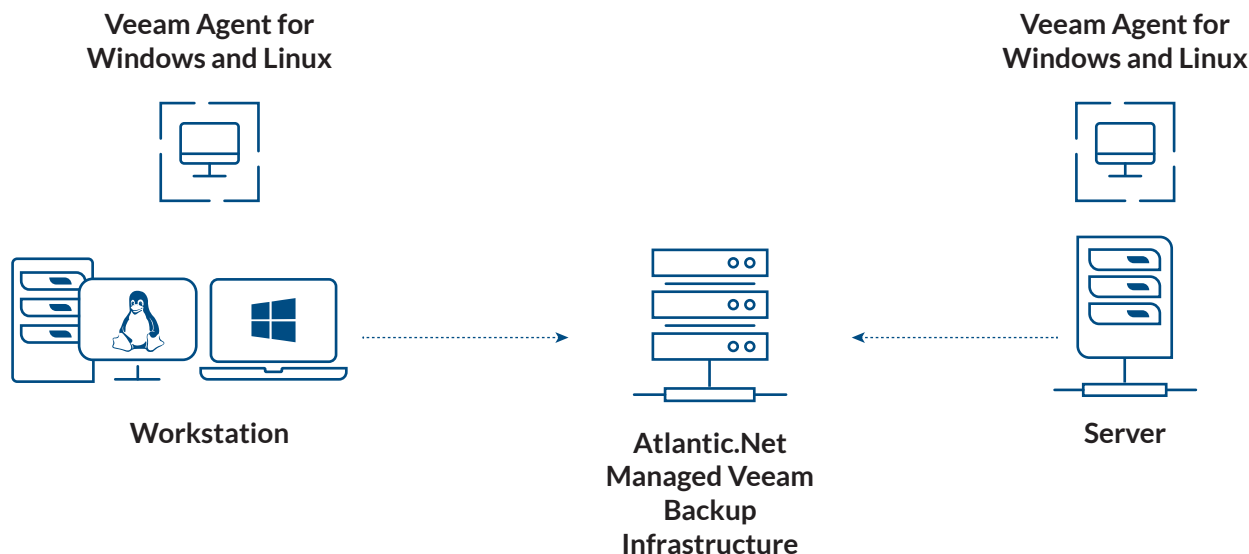

- ✓ **Reduce Costs:** A managed Veeam backup service simplifies licencing complexities and costs associated with replicated backup storage. We manage any required additional hardware acquisitions, deployments, and system upgrades.
- ✓ **Incremental Forever Technology:** After a full backup seed has completed, an incremental backup is scheduled which copies only new or changed data blocks, reducing backup size. Also, advanced deduplication technology significantly reduces the backup set sizes.
- ✓ **High Speed Backup and Recovery:** Incremental backups are super-fast and use minimal system resources. Recovery is lightning-quick and bulletproof, as each backup is validated for integrity prior to being marked successful.
- ✓ **Onsite/Offsite Backup Capabilities:** Our entire highly available solution offers on-site storage for local backups and off-site storage capabilities at any of our seven global data center locations.
- ✓ **Veeam Agents:** Veeam Agents fully support Microsoft Windows and Linux distributions and deliver comprehensive backup and recovery for ALL workloads - virtual, physical, cloud-based including SQL, Oracle, and application specific!
- ✓ **Linux Supported Distributions:** Both 64-bit and 32-bit | Debian, Ubuntu, CentOS, Oracle Linux, RHEL, Fedora, openSUSE, SLES. Kernel 2.6.32 or later required
- ✓ **Windows Supported Distributions:** Both 64-bit and 32-bit | Microsoft Windows 7, Windows 8.x, Windows 10, Windows Server 2008 R2 SP1, Windows Server 2012, Windows Server 2012 R2, Windows Server 2016, Windows Server 2019

VEEAM BACKUP

AVAILABLE BACKUP TYPES INCLUDE:

- ✓ **Restoring Options:** Back up and restore your entire virtual or physical server to the original location or newly rovisioned environment. We can also do a bare-metal restore directly to a dedicated server or a hypervisor, such as private cloud or public cloud.
- ✓ **Volume-level:** Backup and restore an entire hard drive or just a partition in its entirety to protect against corrupt files and volume degradation.
- ✓ **Granular File-level:** Restore individual files from any backup file to any contactable destination server in minutes.

Ready to Get Started with Veeam Backup?

Atlantic.Net stands ready to help you attain fast compliance with a range of certifications, such as SOC 2 and SOC 3, HIPAA, and HITECH, all with 24x7x365 support, monitoring, and world-class data center infrastructure. For faster application deployment, free IT architecture design, and assessment, visit us at www.atlantic.net, call **888-618-DATA (3282)**, or email us at sales@atlantic.net.
